

Terra Australis

Terra Australis (TA) reports the results of archaeological and related research within the south and east of Asia, though mainly Australia, New Guinea and island Melanesia – lands that remained terra australis incognita to generations of prehistorians. Its subject is the settlement of the diverse environments in this isolated quarter of the globe by peoples who have maintained their discrete and traditional ways of life into the recent recorded or remembered past and at times into the observable present.

E P R E S S
